SUMMARY

Revenue leader with nine years across venture-backed B2B SaaS, fintech, proptech, hardware-SaaS, and QSR automation. I build revenue engines where the system is still forming, from ICP and pricing to outbound, channel partnerships, hiring, coaching, forecast cadence, and closing the loop from customer signal back into product. I have built the revenue function from zero twice and professionalized an existing one four times. Two companies were acquired during my tenure, Hubdoc by Xero and Lane by VTS.
